

Ingredient Manual Check-Weigh Software

for

Increased productivity and accurate weight control

Factories using our software have reported a marked increase in productivity since the installation of our Ingredient Manual Check-Weigh Software

- ◆ On-Scale filling of ingredients
- ◆ Automatic download of user configurable limits from PC database
- ◆ Continuous monitoring of ingredient weights and optimisation of limits to ensure best compensation for filling errors such as user bias and product variation
- ◆ Operates in both Takeaway and Positive checkweighing mode on same system
- ◆ Auto-detects product removal. No action required by operator to capture weight
- ◆ Ingredient selection from scale, PC, or handheld terminal
- ◆ Increases productivity, improves accuracy and reduces overfill
- ◆ Operator performance by user is visible on the Supervisor's PC and secondary screen
- ◆ Up to 128 scales controlled from one PC
- ◆ Suitable scales need not be of one type. User friendly, easy to use interface
- ◆ Real Time information available on local and networked PC's
- ◆ Comprehensive, real-time reports covering pre-set or free-choice periods
- ◆ Wireless options available for complete flexibility to change line configurations
- ◆ Software proved in over 200 industries including food, drink, chemicals and textiles

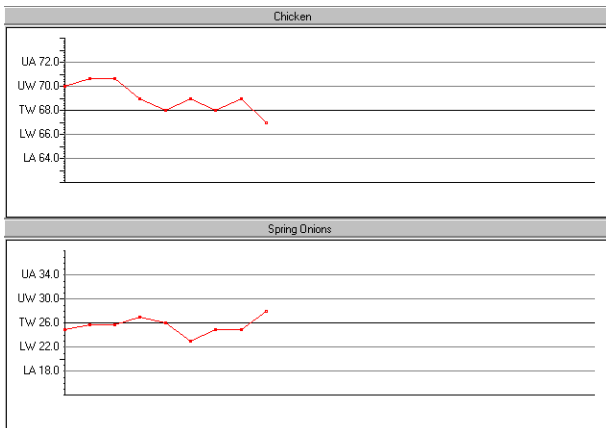

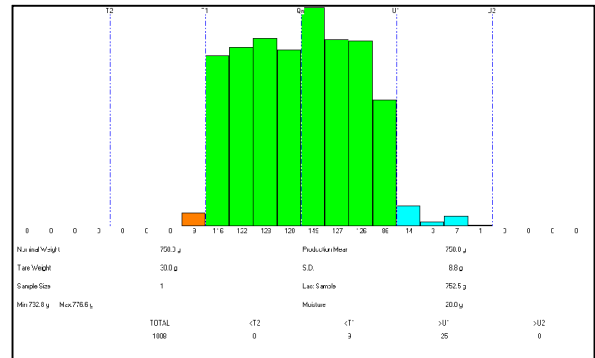

Optional additional **MCI Myrias** software modules include:

- MCI Myrias Recipe** Mixing
- MCI Myrias Traceability** for Lot, Batch and other identifiers
- MCI Myrias Quality** attribute monitoring with AQL warnings and quarantine recording
- MCI Myrias Human Resources Management**
- MCI Myrias Stock Management** and Rotation for stores and WIP
- MCI Myrias Coding Management** and Date Code verification

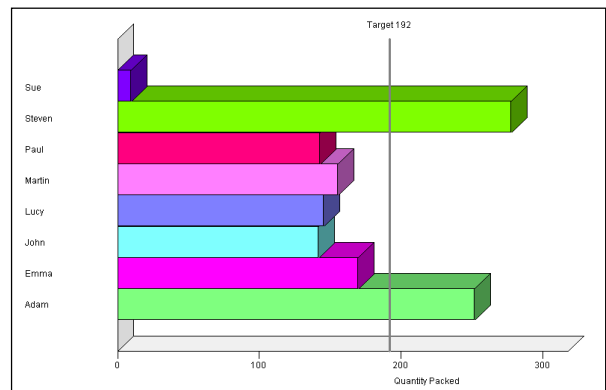

SCREEN DISPLAYS AND PRINTED REPORTS

- ◆ Quick and easy access to required results
- ◆ Ingredient results available by shift, day or period
- ◆ Graphical reports - Histogram, Trend and Control

- ◆ Real time display of current production
- ◆ Raw Data Summary of each individual record
- ◆ Time base and zoom facility for trend graph

- ◆ Real time display of Production count by operator against target
- ◆ User editable tabular reports
- ◆ Bespoke reports if required

MCI Myrias Manual Check-Weigh software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. **MCI Myrias** has a record of reducing manufacturing costs in almost every field of application.
