

Checking on Quality?

MCI Myrias Quality software for structured Quality checking

MCI Myrias Quality software offers a flexible method for Quality checking in a dynamic production environment. Traditional paper checksheets are replaced by a clear, unambiguous, prompt-and-entry dialogue on the Operator terminal and the data stored on computer. Changes in the Quality checklist can be implemented in minutes by the Manager without the delay of photocopying new checksheets for production line staff. The risk of using out-of-date or 'wrong product' sheets is completely removed.

Well designed reports display Quality excursions in easy-to-understand formats yet still allow detailed examination of original data.

- ◆ **MCI Myrias** proved in over 200 installations including food, drink, chemicals and manufacturing
- ◆ Utilises standard Operator terminals, label printers, bar code scanners, PC stations and data networks
- ◆ Allows up to 30 Quality questions in each of 100 lists, each allowing 5 options for Operator response
- ◆ User-editable texts for Quality questions, response key labels and prompting messages.
- ◆ Questions may be linked to investigate adverse responses, with 'nests' up to 15 deep
- ◆ User-editable, context-sensitive warning messages displayed to Operator during dialogue
- ◆ Quality questions may be embedded in optional and/or non-optional Operator routines
- ◆ Real-time, dynamic screen graphic reports covering all aspects of Quality performance, selectable by time and other filters: comprehensive, configurable reports in table format

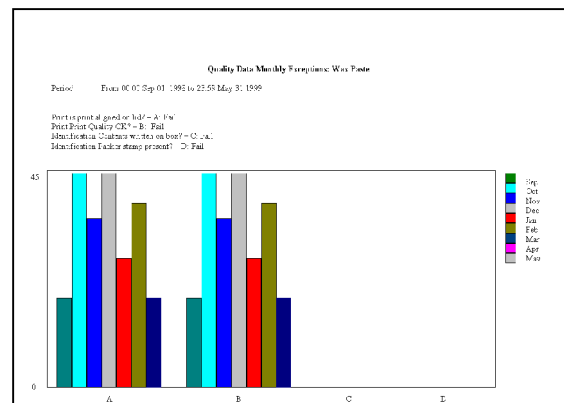

Optional additional **MCI Myrias** software modules include:

- Monitoring of Quality against user-specified AQL levels with warnings.
- Response scoring for statistical analysis
- Quarantine database of Quality incidents

SCREEN DISPLAYS AND PRINTED REPORTS

- ◆ Quick and easy access to recorded information
- ◆ Standard graphics of bar charts, pie charts and scored web
- ◆ Results can be filtered by Product, Line etc.

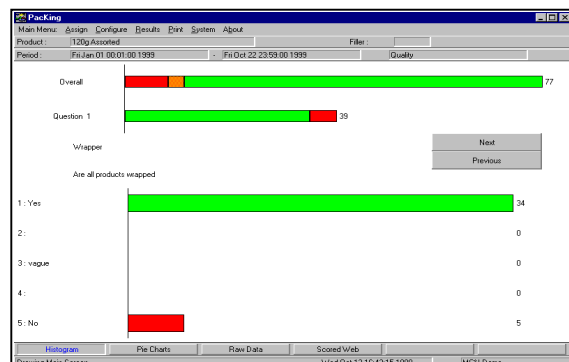

| Page 1 of 40 | | | | |
|---------------------------------------|-----|----|----------|------|
| 01 Wrapper / Are all products wrapped | Yes | 34 | vague 0 | No 5 |
| 02 Box / Is box formed | Yes | 32 | Partly 3 | No 3 |

Navigation: Previous, Next, Histogram, Pie Charts, Raw Data, Scored Web, Page 1 of 40

- ◆ Individual Operator Quality sessions recorded
- ◆ Reports available of full records or by exception only
- ◆ Original session records show full details of questions and responses

- ◆ Reports over shift, day or free-choice periods
- ◆ All records stamped with date and time
- ◆ Bespoke reports as required

MCI Myrias Quality software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. **MCI Myrias** has a record of reducing manufacturing costs in almost every field of application.
