Ever had product rejected because the packaging was wrong?

MCI Myrias Component Code software helps you check that the packaging is <u>exactly</u> what it should be

MCI Myrias Component Code software checks that the packaging that encloses your product is exactly to specification. With so many similar containers, closures and labels, it can be tricky for Operators to make sure that they are using the correct components to package the product. So *MCI Myrias* prompts the Operator to enter or confirm codes printed on the packaging components and checks them against the Management-entered database, warning of non-compliance.

♦ Runs on standard MCI Myrias systems under the Quantity module for Filling Line control

♦ Manager-edited database of component names, codes, part numbers etc.

♦ Configurable Operator prompt-and-entry dialogue for component code check

♦ Optional additional dialogue for recording component Batch No, Lot No and quantity

♦ Check frequency can be configured to suit regime

♦ Full accountability and traceability data for every component code check

♦ Colour-coded bar-chart analysis of Operator-selected reasons

MCI Myrias software has been proved in over 15 years of practical application throughout British Industry. Installations in food, drink, chemicals and engineering plants have helped to reduce production costs, improve quality and provide records for regulatory requirements.

Optional additional *MCI Myrias* software modules include:

> Date Code Module for checking Best Before and other life-expiry codes
> Lot/Batch/other identifiers for product traceability
> *MCI Myrias Quality* Module for quality attribute checking against AQL

SCREEN DISPLAYS AND PRINTED REPORTS

♦ Quick and easy access to recorded information

♦ Checks up to 10 component codes as standard for each Product

♦ Simple procedure to copy and edit component code lists

♦ Timestamped, identified, individual component code check records

♦ Reports can be filtered by time-frame, Product, Line, Operator, Batch and other identifiers

♦ Real time data

♦ Records acceptable for Trading Standards, BRC, legal and regulatory requirements

♦ Print-out of screen displays and report tables

♦ Bespoke reports as required

MCI Myrias Component Code software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. ***MCI Myrias*** has a record of reducing manufacturing costs in almost every field of application.
