How to ensure that correct codes are used

MCI Myrias Coding Management software for accurate coding of product and components

MCI Myrias Coding Management software removes the human error in setting codes on your products and selecting materials and packaging by their codes.

- ♦ Fast and accurate operation, improving speed of changeover and accuracy of production

- ♦ Automatic setup of coding and labelling equipment for each new job, ensuring that all codes, label information, date codes and other production parameters are correctly set

- ♦ Standard libraries for most industrial readers and printers

- ♦ All standard barcode types including EAN/UPC, Code 39, Code 2/5, EAN128, PDF417

- ♦ Devices can be linked by serial cable, network cable or RF

- ♦ Validation of product labels and components to ensure that the correct product is in the correct container

- ♦ Design labels and setup shop floor printers centrally from your office using just one design package and one label design over different printer types

- ♦ Scanners can be handheld, fixed position or RFID

- ♦ Ensure good customer relations with accurate coding by removing the risk of errors

- ♦ Ensure food safety by using the correct released ingredients every time

- ♦ Software proved in over 200 installations including food, drink, chemicals and engineering
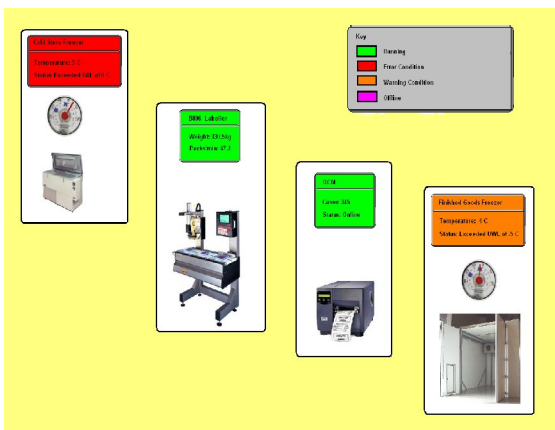

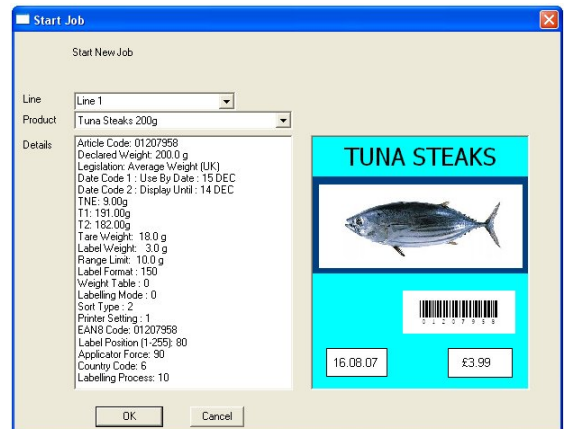

♦ Stable software with dedicated support team knowledgeable about all aspects of production

♦ Supports all Windows™ platforms – Vista, XP, Server 2003, NT, 98, 95, CE, PPC, Mobile, and can utilise standard Windows™ technologies such as SQL Server, DDE, Office, etc.

♦ Can be linked to additional MCI Myrias modules such as Weight Control, Stock Control, Material Ordering, Purchase Ordering, Dispatch, Quality Control, etc.

♦ Can integrate with 3rd party software such as MRP, ERP, MES and Accounting packages such as SAP, SCADA and SAGE via techniques such as SQL, ODBC and text files
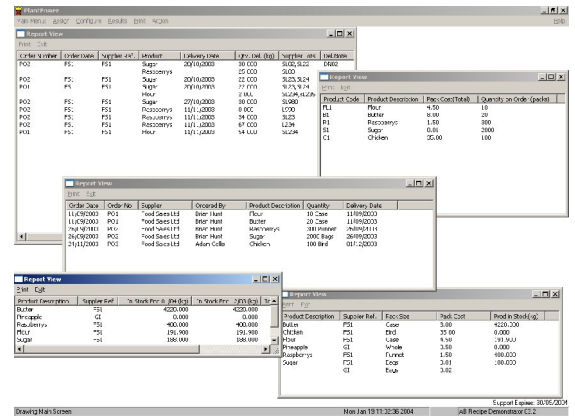

SCREEN DISPLAYS AND PRINTED REPORTS

♦ See exactly the details for your new job before downloading to all the devices on the line

♦ View label design on your specific labels

♦ Quick and easy access to recorded information

♦ Monitor the status of all your devices in real time

♦ Comprehensive collection of real-time reports

♦ Historical and real-time reports of each code downloaded to each device, selectable by time, line, product, operator, etc.

♦ Full Lot and Batch traceability

♦ Automatic generation of reports to printer, pdf, or html and exports to SQL, etc.

♦ Bespoke reports as required

♦ Able to record a wide range of production information such as average weights, temperatures, torques, etc.

♦ Records acceptable for Trading Standards, BRC and other legal and regulatory requirements

♦ Reports are available throughout your enterprise over LAN and WLAN via networked versions of MCI Myrias or pdf and html files

MCI Myrias Coding Management software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. *MCI Myrias* has a record of reducing manufacturing costs in almost every field of application.
