

What's going on in your factory? MCI Myrias tells you in real time!

MCI Myrias reads data from process plant, lab instruments, factory test and measurement equipment

MCI Myrias software reads data from the communications ports of your factory equipment, logs it on disk and uses it to provide you with a real-time picture of events on the factory floor. Key process data like temperatures, pressures, feed rates, flow rates, speeds and many other indicators of the state of your production can all be derived from standard electronic devices which you may already have in place. They just need a link to **MCI Myrias** with the right choice of application modules.

MCI Myrias interfaces to these and others through cable or wireless serial, LAN, WAN or Internet:

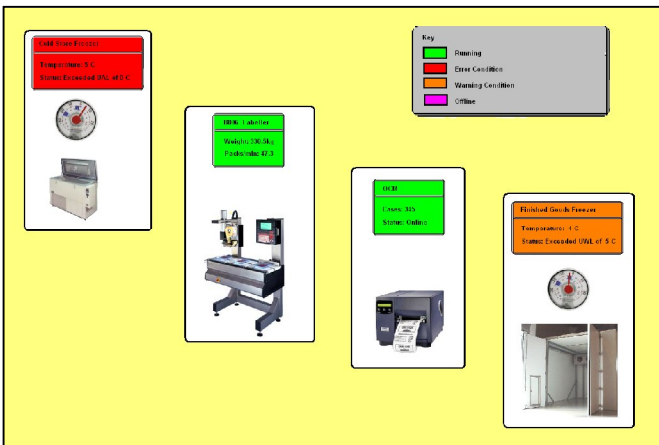

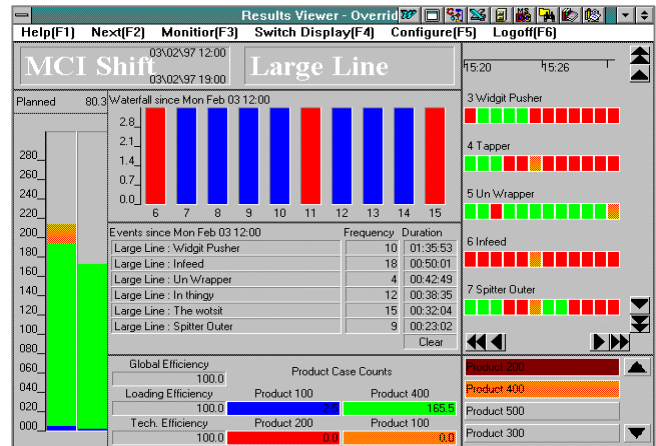

- ◆ Dynamic and manual checkweighers, weigh-price labellers and metal detectors
- ◆ Multi-bucket and multi-head filling machines
- ◆ Digital thermometers, pressure gauges, flow meters and other process instrumentation
- ◆ Data terminals, PCs,
- ◆ Scales, balances and all types of weighers
- ◆ Digital I/O, PLCs and SCADA systems
- ◆ Bar code and magnetic stripe readers
- ◆ Digital micrometers and verniers
- ◆ Video inspection systems
- ◆ Laboratory instrumentation
- ◆ ERP / MRP systems, accounting packages, third-party software applications

MCI Myrias software has been proved in over 200 installations including food, drink, chemicals and engineering, helping to reduce production costs, maintain quality and provide records for legal and regulatory requirements.

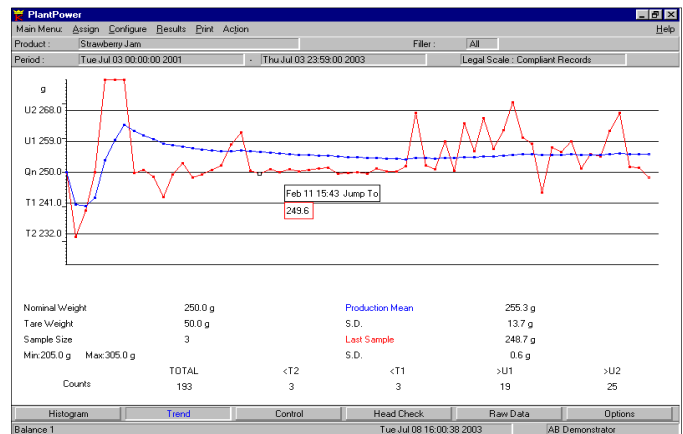

SCREEN DISPLAYS AND PRINTED REPORTS

- ◆ Colour mimics with dynamic variables
- ◆ Trends, histograms, 2D and 3D graphics, transactions, exceptions, all in colour
- ◆ Single plot or composite result screen

- ◆ Recording and reporting of data entry, warnings and acknowledgements
- ◆ Configurable Management reports between selected dates/times
- ◆ User-configurable report tables

- ◆ Runs on **MCI Myrias** systems under easy-to-use standard software
- ◆ Data acquisition can be fully automatic or keyed in by an Operator
- ◆ Displayed warnings for Operator and Manager on out-of-spec conditions

MCI Myrias is an integrated suite of software modules covering many aspects of data acquisition, reporting and control of factory processes from procurement through production to despatch. **MCI Myrias** has a record of reducing manufacturing costs in almost every field of application.
