

## *Do you want accurate real-time distribution?*

*MCI Myrias helps you keep control of the ordering, storage, and distribution of your goods*

**MCI Myrias** is a modular system designed for real-time control of stock, helping you ensuring that all items are in stock before they are required for dispatch. The system labels and barcodes all deliveries, and tracks each item through your process to its final dispatch. This gives a complete traceability record. The system manages supplier details, ordering and delivery of materials, warehousing, dispatch picking, and final invoicing. Levels and locations of stock held in warehouses and other locations can be analysed quickly for value, traceability and other purposes.

**SCREEN DISPLAYS AND PRINTED REPORTS**

- ◆ Accurate fulfilment of customer orders
- ◆ Full traceability
- ◆ Real Time Data
- ◆ Data sorted by a comprehensive set of filters
- ◆ Stock quantities and values by location or supplier

- ◆ Scrap, waste, downgrades, transfers, all recorded
- ◆ All records stamped with date and time
- ◆ Bespoke reports as required
