

New filler? Old filler? Get the best out of it!

MCI Myrias FillerWatch software for pack fills to meet legal requirements and limit give-away

MCI Myrias FillerWatch software keeps a close watch on the output of your filling line, old or new, monitoring pack fills against legislative or in-house targets and production throughput against planned programme. **MCI Myrias** spots drifts in average - however caused - and flags them, together with shorter-term variations, as unmistakable, high-visibility alarms. Expensive give-away or risky underfilling is caught at an early stage.

MCI Myrias software utilises your in-line dynamic checkweighers, off-line electronic sampling scales or other measuring devices to offer up to 100% real-time charting of every pack that your filler produces. **MCI Myrias** even advises you how to adjust your fill levels to remain legal and safe.

- ◆ Links to multiple checkweighers and weigh-stations without loss of system performance
- ◆ Interfaces to all popular makes of dynamic checkweighers and static electronic scales
- ◆ Communications by cable or RF to stand-alone Management PC or network
- ◆ PC screen warnings displayed for individual and collective pack fill infringements
- ◆ Real-time, dynamic screen graphic reports covering all aspects of filler performance, selectable by time and other filters
- ◆ Comprehensive, configurable reports in table format
- ◆ Software proved in over 200 installations including food, drink, chemicals and engineering

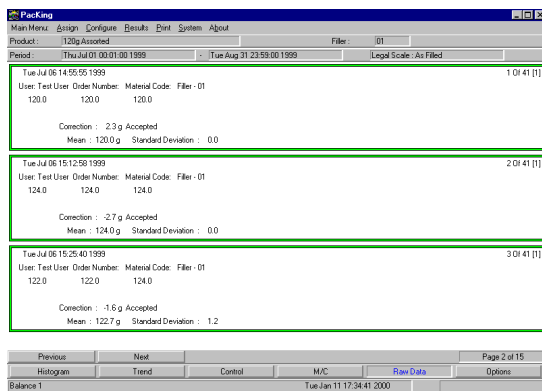

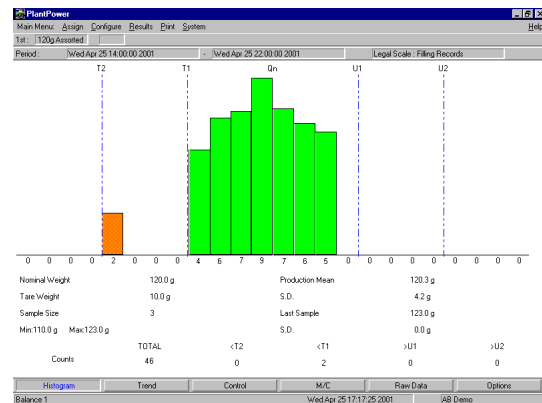

Optional additional **MCI Myrias** software modules include:

- Feedback to automatic filling machines for closed-loop weight control
- Individual fill head performance analysis
- Lot/Batch/other identifiers for full traceability
- Line efficiency and total weight throughput based on actual production rate

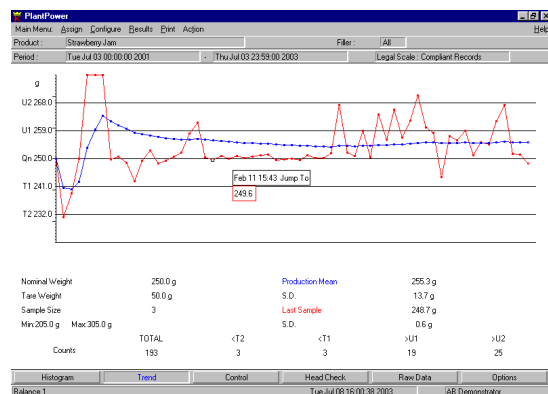

SCREEN DISPLAYS AND PRINTED REPORTS

- ◆ Quick and easy access to recorded information
- ◆ Colour-coded histogram, trend, original data charts
- ◆ Composite and separate charts for each product run and filler
- ◆ Separate charts for legal compliance and control

- ◆ Trend plotted with event- or time-base, incorporating zoom facility
- ◆ Original data transactions show full details of each pack fill
- ◆ User configurable report tables
- ◆ Colour-coded data for easy

- ◆ Records acceptable for Trading Standards, BRC and other legal and regulatory requirements
- ◆ Print-out of screen displays and report tables
- ◆ All records stamped with date and time
- ◆ Bespoke reports as required

MCI Myrias FillerWatch software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. **MCI Myrias** has a record of reducing manufacturing costs in almost every field of application.
