# *Weighbridge Data Capture System?*

MCI Myrias – the complete solution
expandable for all your need

MCI Myrias Weighbridge software can provide solutions for all your control and management requirements for your vehicle weighing. This flexible and powerful *MCI Myrias* software links intelligently with external or built in order and materials systems. The system has modules that cover managing hauliers, supplier and customer details, materials, planning, order processing, and dispatch. Vehicle movements and loads can be analysed quickly for value, traceability and other purposes
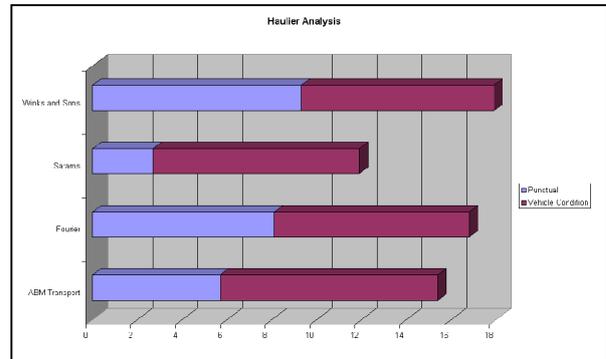

◆ Works with a wide range of weighbridge indicators from many different suppliers

◆ Features to maximise vehicle throughput, while reducing the risk of data entry errors

◆ Designed by an experienced development team to provide an easy to use interface, with clear operator prompts to guide the user quickly and smoothly though a transaction

◆ Well proven technology - a record of reducing costs in over 200 successful installations over the last 20 years

◆ Multiple sites can be networked back to regional and head offices for orders, accounts, reporting, etc.

◆ All software runs under Microsoft Windows. All versions are supported, including Vista, XP and Server 2003. Links with Microsoft products such as Excel and SQL Server

```

◆ Weighbridge functions can take data directly from waiting purchase and sales orders, and feed back information for accurate invoicing

◆ Comprehensive database of customers, materials, pricing, hazard information

◆ Planned deliveries and dispatches optimise use of dock labour, and reduce queuing at the weighbridge

◆ In conjunction with production modules, the system is able to track which batches of material are on each vehicle

◆ Financial processing can be accommodated within *MCI Myrias* or by a software link to third-party accounting package

SCREEN DISPLAYS AND PRINTED REPORTS

♦ Full traceability for all transactions

♦ Stored vehicle tares and details

♦ Instant recall of haulier and customer details

♦ Data sorted by a comprehensive set of filters

♦ Real time reporting of tonnage and values by haulier, customer, product, etc.

♦ Fast and accurate invoicing fulfilment reports, allowing improved cash flow by reducing billing cycles

♦ View the status of each order at a glance

♦ Ensures compliance with legal requirements

♦ Analysis reports on haulier, supplier and customers

♦ Optional access control devices such as traffic lights, barriers and video capture

♦ Optional visitors' log recording all vehicle access to site

♦ Job and contract pricing

♦ Pre-programme price changes by site

♦ Quotes with conversion to orders

♦ Customer database includes current balance, credit limit, and discounts

♦ Contract file including daily orders

♦ Document scanning, storage and retrieval

♦ Expandable system, able to grow with all your future business requirements

♦ Bespoke reports as required

MCI Myrias Weighbridge software is just one module in a suite covering many aspects of industry. In total, over thirty integrated software modules are available to record, control and report on every aspect of purchasing, planning, production, sales and despatch.
