When the job isn't going to plan, do you know why?

MCI Myrias Abort/Ignore software helps you discover more about problems with Filling Line checks

MCI Myrias Abort/Ignore software helps you discover why normal filling Line Checks aren't being followed or why suggested filler adjustments aren't made. This module lets your Production or Quality staff give you an explanation of failed or missed checks in standardised texts, using terms that you understand. Reports cover individual incidents or summarise trends by time-frame, Line, Product and other filters.

When you know what's going wrong, you can do something about it!

- ♦ Runs on standard MCI Myrias systems under Quantity module for Filling Line control

- ♦ Manager-edited database of standard texts

- ♦ Multiple text lists can be configured to suit different Products or process groups

- ♦ Operator choice of single or multiple texts to explain failures, missed checks, changes and other excursions

- ♦ MCI Myrias adds Operator-selected text to records of incomplete or aborted checks

- ♦ Full accountability and traceability data for every non-standard fill check

- ♦ Colour-coded bar-chart analysis of Operator-selected reasons

MCI Myrias software has been proved in over 15 years of practical application throughout British Industry. Installations in food, drink, chemicals and engineering plants have helped to reduce production costs, improve quality and provide records for legal and regulatory requirements.

Optional additional ***MCI Myrias*** software modules include:

Statistical control by sampling for container weight trends
Lot/Batch/other identifiers for full traceability
MCI Myrias Quality module for quality attribute checking against AQL

SCREEN DISPLAYS AND PRINTED REPORTS

♦ Quick and easy access to recorded information

♦ Multiple text lists configurable by Product

♦ Simple procedure to copy and edit long text lists

♦ Timestamped, identified, individual incident record

♦ Reports filtered by time-frame, Product, Line, Operator, Batch and other identifiers

♦ Colour-coded bar charts showing frequency of use for each text

♦ Records acceptable for Trading Standards, BRC,legal and regulatory requirements

♦ Print-out of screen displays and report tables

♦ Bespoke reports as required

MCI Myrias Abort/Ignore software is just one module in a suite covering many aspects of manufacture. In total, over thirty integrated software modules are available to record, control and report on every aspect of procurement, planning, production and despatch. **MCI Myrias** has a record of reducing manufacturing costs in almost every field of application.
